How to pair the iPhone and Streamer Pro

Does my Streamer Pro work with the ConnectLine App for iPhone, iPad and iPod touch ?

Note:

For the Streamer to work with the app it has to have an "A" marking as indicated above.

Prepare Streamer

Press the power button on top of the Streamer until the top LED flashes blue.

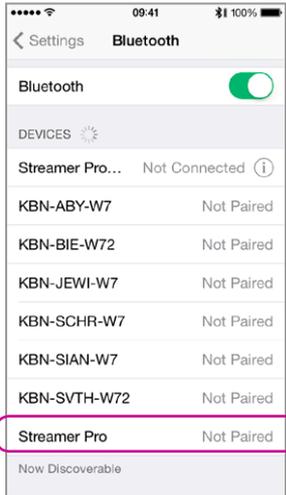

Enter settings

Find the settings icon on the iPhone.

Select Bluetooth

Find the Bluetooth icon in the settings menu.

Find Streamer Pro

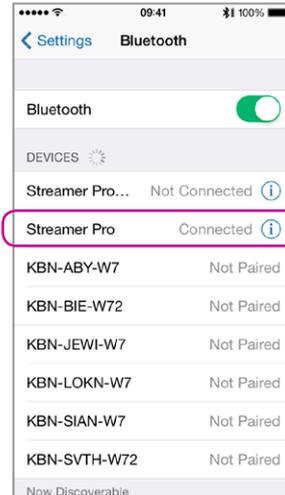

Select Streamer Pro

Enter Pin #0000

In the pairing menu, enter the Pin for Streamer 0000 (four zeros).

Press Pair

Verify connection

Check that Streamer Pro is now connected. It should read "Connected" and you should see a small Bluetooth icon in the top status menu.

Streamer as default audio output

By default, an iPhone will use the built-in speaker for audio when answering a call on the iPhone itself, even if a Bluetooth Headset (such as the Streamer) is connected.

However, for everyday use of the iPhone with a pair of hearing instruments, settings may be changed, so that the sound is always in the hearing instruments (through the Streamer).

Select Settings

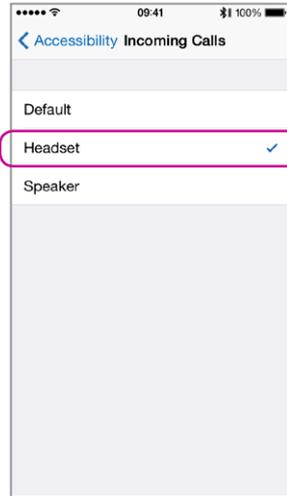

Select General

Select Accessibility

Select Incoming Calls

Select Headset

Verify

When answering a call from the iPhone, you should see Streamer Pro as audio output (and hear the call in the hearing instruments) See more on page 14.

Install App

Enter App Store

Find the App Store logo on your device.
Press it.

Step 1:
In App Store select the search function.

Step 2:
In the search field, type "Oticon".

Step 3:
Press the blue "free" icon to start download.

Step 4:
Enter your Apple ID password to start downloading.

Search, download & sign in

Note:

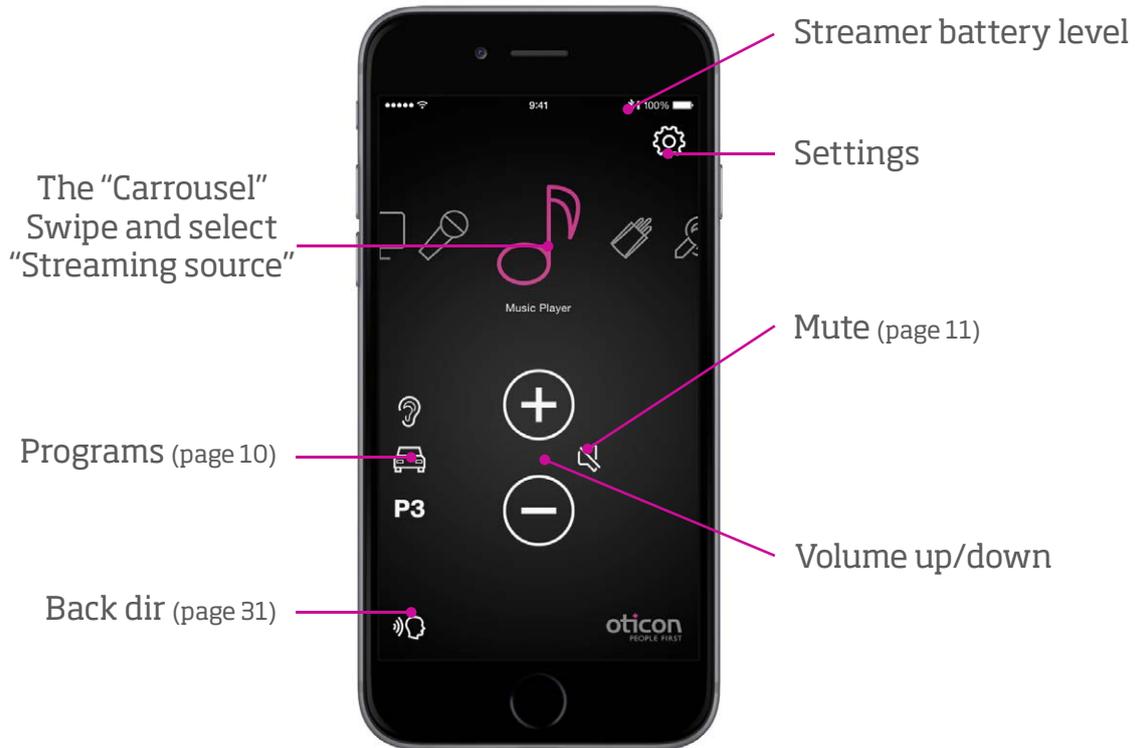

To use the App with an iPad you need to install the iPhone app through the App Store (there is no separate ConnectLine App for iPad in App Store)

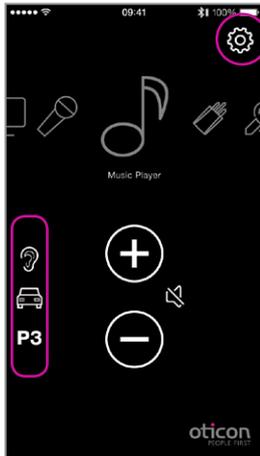

App available

The ConnectLine App should now be on your iPhone, iPad or iPod touch.

App overview

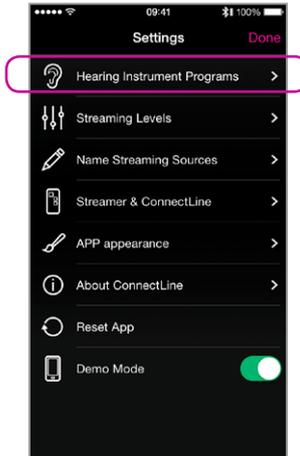

Programs

Program selector

Hearing instrument programs can be selected directly.

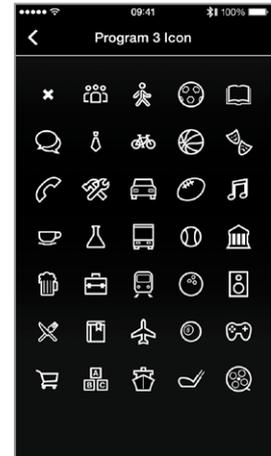

Custom labelling

Labels can be assigned to programs that already exist in the Hearing instruments.

Custom labels

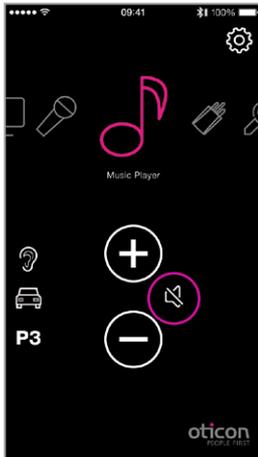

Settings --> Hearing Instrument Programs --> Press + to select an icon for the specific program.

Note:

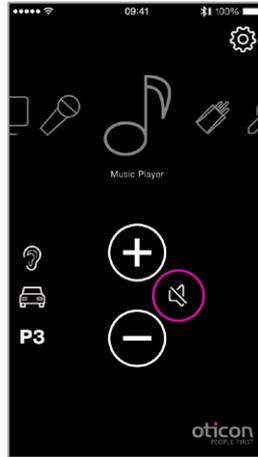

Adding a label here does NOT add a new program in the Hearing Instruments.

Mute

While Streaming

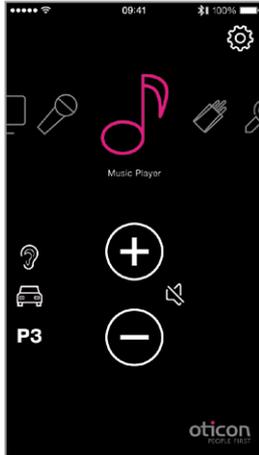

While streaming, the microphones of the hearing instruments can be muted to suppress surrounding sound/noise.

While not Streaming

If not Streaming, the microphones on Oticon Alta, Nera, Ria and Sensei hearing instruments can be muted for quiet/comfort.

Answer call - App running

App is running

The ConnectLine App is running. In this example the user is listening to music (from the iPhone).

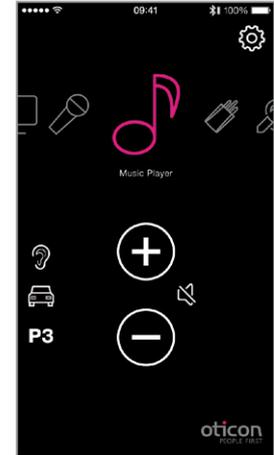

Incoming call

When receiving an incoming call, the ConnectLine App is "pushed to the back" and the iPhone's normal call handling window is opened. The call is either answered on the Streamer itself or using the iPhone's answer button (1).

In a call

When taking a call, the iPhone's call handling window continues to be active.

Autoresume

When the call is ended, the App (and the Connectline system) returns to its previous state (Autoresume). In this example, it returns to the music screen.

App NOT running

App is not running

If the ConnectLine App is not running, the phone is typically on its "home view".

Incoming call

When the user receives an incoming call, the ConnectLine App is "pushed to the back" and the iPhone's normal call handling window is opened. The call is either answered on the Streamer itself or using the iPhone's answer button (2).

In a call

When taking a call, the iPhone's call handling window continues to be active.

Call ended

iPhone returns to previous (idle) state.

2) If this does not work as expected, please check the setup of iPhone on page 6.

Make call, iPhone

App is running

Close the app (press the Home button once).

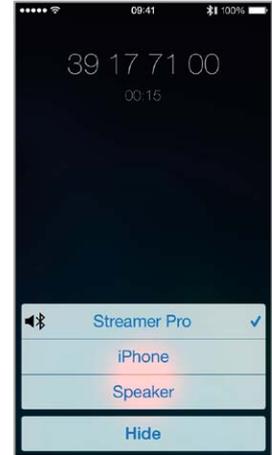

Select Phone

Key in number

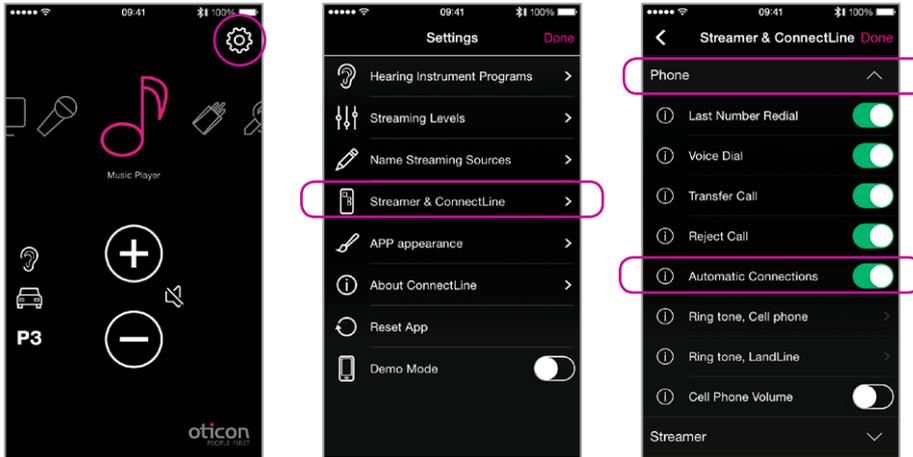

Key in number followed by "Call".

Call active/End call

End call either on the iPhone or on the Streamer Pro (phone button).

Play your favorite music

Automatic connections for music player

To enable the Streamer to automatically start audio Streaming when the music player is running, press and enable "automatic connections".

Settings --> Streamer and ConnectLine --> Phone --> Enable automatic connections

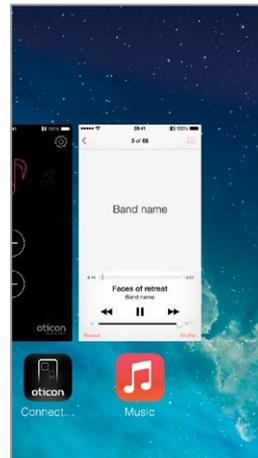

Start music player

Click the home button to push the ConnectLine App into the background. Find and select the "Music" icon.

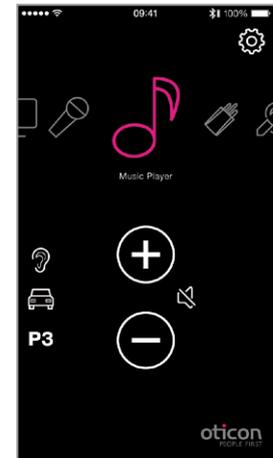

Music player

You can play, pause and regulate volume at will through the music app. Connection is automatically made to Streamer and Hearing instruments.

Switch to the app

If you want to switch back to the app, either press the home button twice for an overview of active apps, and then choose the ConnectLine App or press the Home button once and find the ConnectLine App as you normally would.

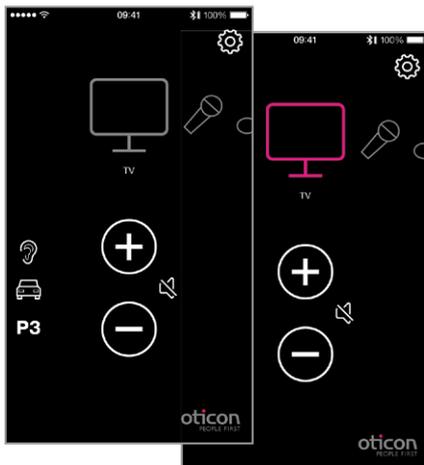

Select and resume

If using the ConnectLine App, the Music icon on the app is now a shortcut to the Music player, which can be started and stopped at will. If other sources are chosen, the music will be paused until selected again.

TV

In Carousel if previously paired

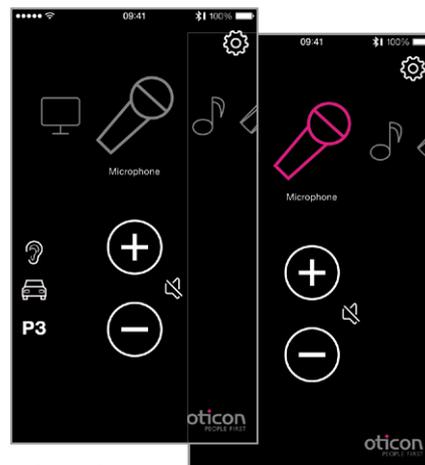

TV

Pressing the TV icon will start/stop audio from the TV adapter.

Microphone

In Carousel if previously paired

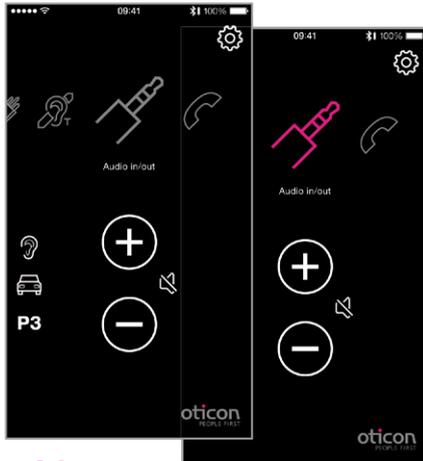

Microphone

Pressing the Microphone icon will start audio streaming from the ConnectLine Microphone. Streaming can also be started from the microphone or from the Streamer.

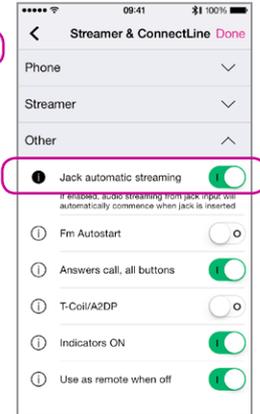

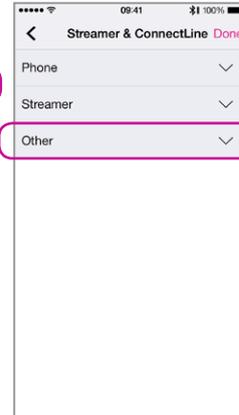

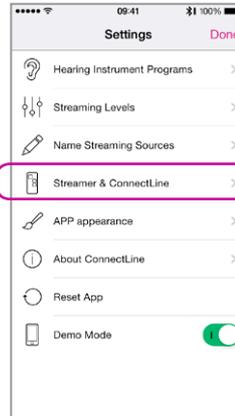

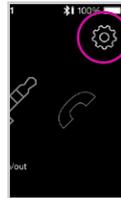

Jack-in

In Carousel if inserted

Jack in/out

If a jack is inserted into the Streamer, audio streaming is automatically started.

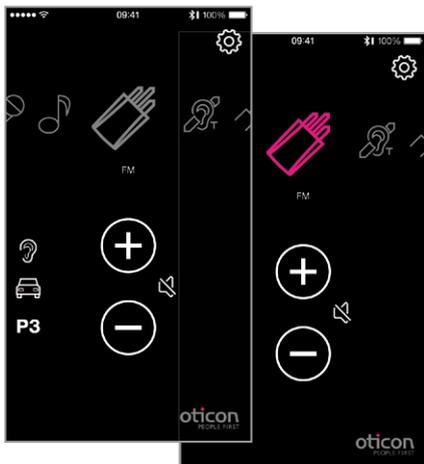

Jack in/out autostart

Jack autostart can be enabled/disabled in Settings.

Settings--> Streamer & ConnectLine --> Other --> Jack automatic streaming

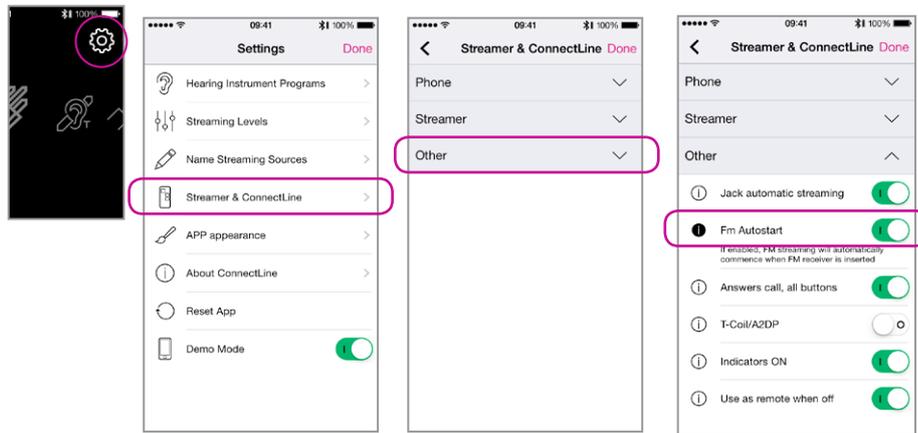

FM

In Carousel if inserted

FM

Pressing the FM icon will start/stop audio streaming from FM.

FM autostart

Jack autostart can be enabled/disabled in Settings.

Settings--> Streamer & ConnectLine --> Other --> FM Autostart

T-Coil

Always in Carrousel

T-Coil

Pressing the T-Coil icon will start/stop audio streaming from T-Coil.

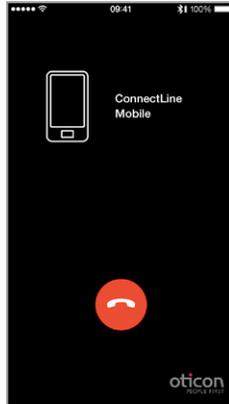

Second mobile phone

Will NOT appear in Carousel

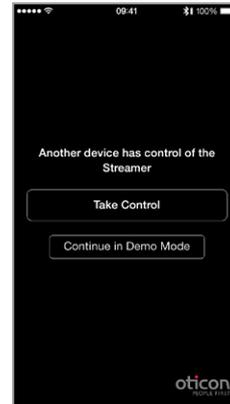

Decline or accept call

An incoming call is signaled in the hearing instruments and in the app. The call can be accepted either in the app or on the Streamer.

End call

The call can be ended in the app (or on the Streamer).

Multiple apps running

If more than one iPhone, iPad or iPod touch are paired with the Streamer, the Streamer will be controlled by the iPhone that most recently opened the app.

WARNING!

To ensure that your system is not operated without your consent or knowledge, we recommend that the app is only installed on your personal devices.

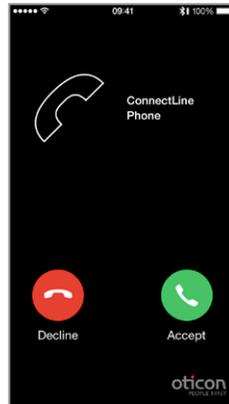

Landline phone

Will appear in Carrousel if in range

App is running

If a landline phone adapter has been paired and is within reach, it will appear as a Phone icon in the App. If the app is not running, the call can only be answered directly from the Streamer.

Answer call

An incoming call is signaled in the hearing instruments and in the app. The call can be accepted either in the app or on the Streamer.

End Call

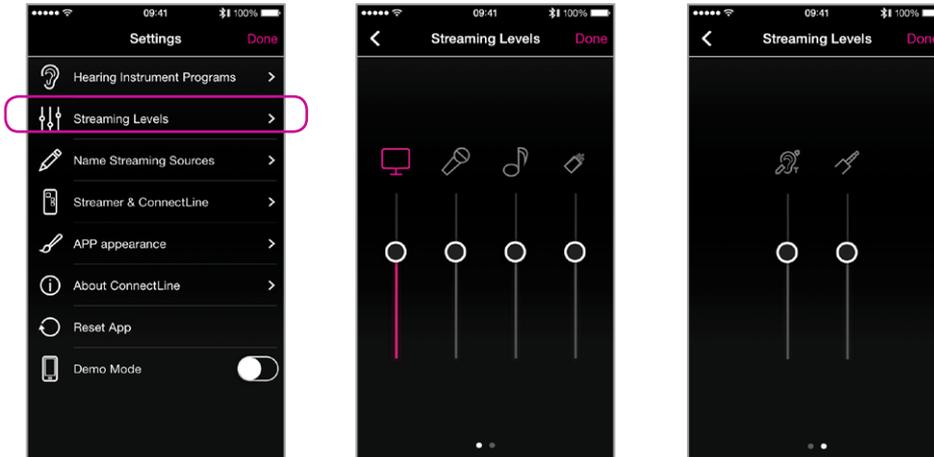

The call can be ended in the app (or on the Streamer).

Autoresume

If another source was active (in this example, music) that source will be resumed after the call is ended.

Settings - Streaming levels

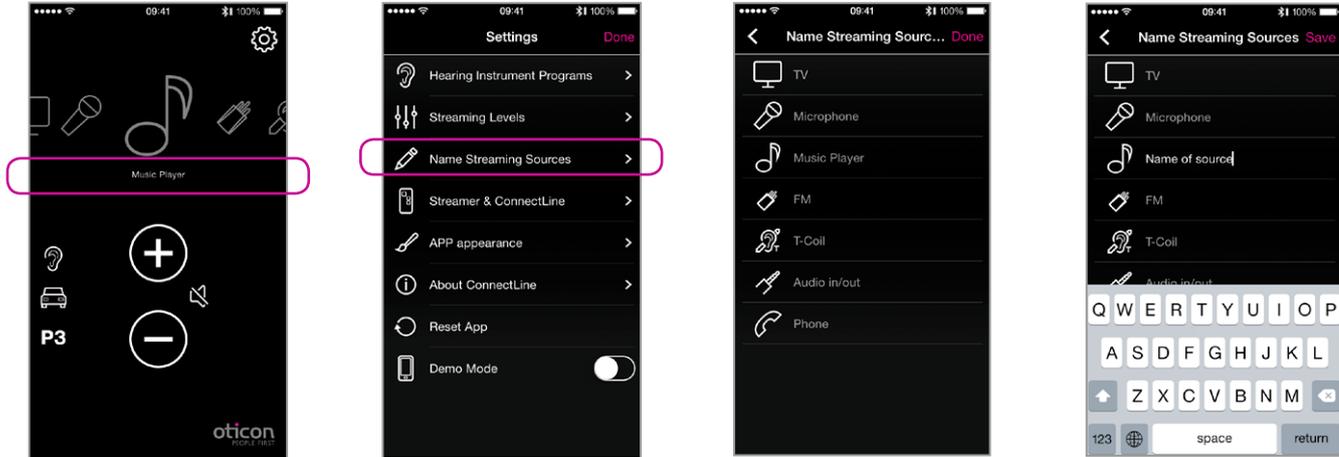

Streaming levels

Streaming levels can be adjusted for each streaming source independently. While streaming, the active source will be highlighted with magenta.

Settings --> Streaming levels

Settings - Streaming source labelling

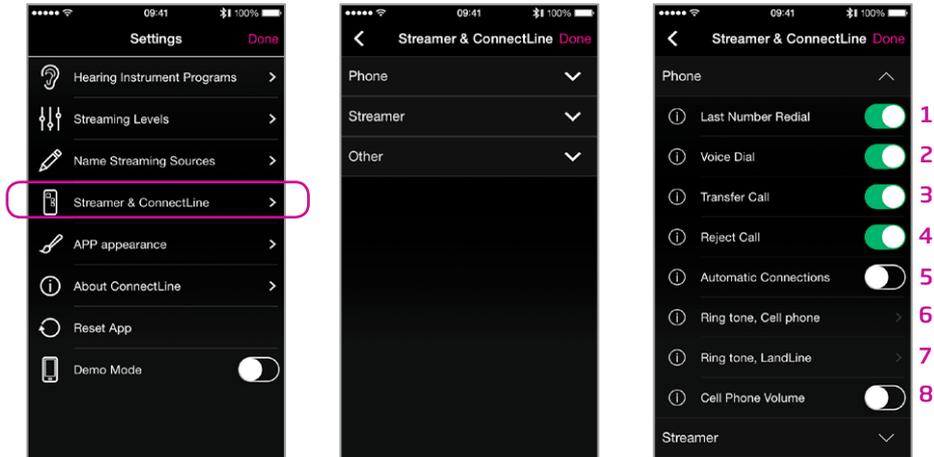

Streaming source labelling

The streaming sources can be labelled according to personal preferences.

Settings --> Name Streaming Sources

Settings - Phone

Phone settings

A selection of settings which affects the daily use of phones may be customised.

1: Last Number Redial

If enabled, last number redial can be started by pressing and holding the phone button on the Streamer (if supported by the mobile phone).

2: Voice Dial

If enabled, briefly pressing the phone button on the Streamer will enable voice dial (if supported by your mobile phone and you are not in range of a ConnectLine phone adapter).

3: Transfer Call

If enabled, pressing and holding the phone button on the Streamer will transfer a call back to the mobile phone.

4: Reject Call

If enabled, an incoming mobile phone call can be rejected by pressing "volume down" on the Streamer.

5: Automatic connections

Allow automatic connections, e.g. SMS notifications and music players.

6: Ring tone, cell

Ring tone associated with calls from your mobile phone(s).

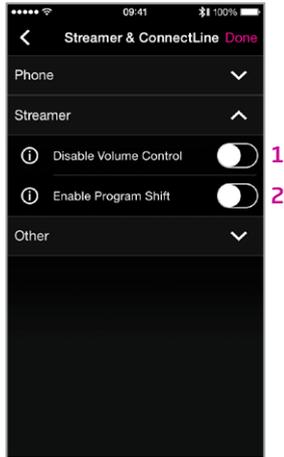

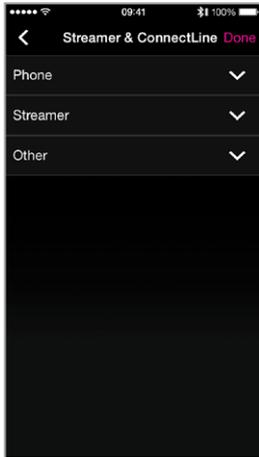

7: Ring tone, landline

Ring tone associated with calls from the ConnectLine phone solution.

8: Mobile phone volume

Enables you to adjust the volume of the call using the volume buttons on the mobile phone.

Settings - Streamer

1: Disable Volume Control

If enabled, volume control of hearing instruments cannot be carried out using the Streamer.

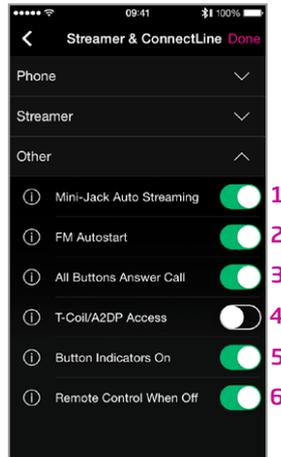

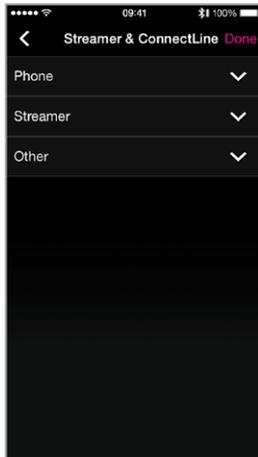

2: Enable Program Shift

If enabled, program shift of hearing instruments cannot be carried out using the Streamer.

Streamer settings

A selection of settings may be customised.

Settings - Other

Other settings

A selection of settings which affects the daily use of the Streamer itself may be customised.

1: Jack automatic streaming

If enabled, audio streaming from jack input will automatically commence when jack is inserted.

2: FM Autostart

If enabled, FM streaming will automatically commence when FM receiver is inserted.

3: Answers call, all buttons

If enabled, all front buttons can be used to answer call.

4: T-Coil/A2DP

If not selected, a single press of the Streamer AUX button, starts A2DP. If selected, a single press of the Streamer AUX button, starts the T-Coil.

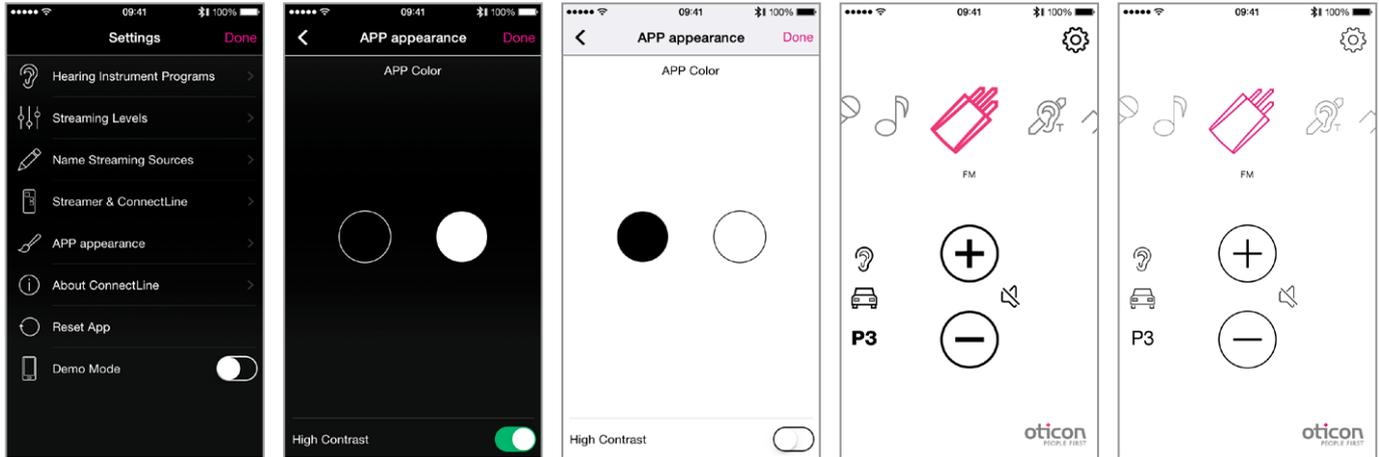

5: Indicators ON

When indicators are off there are no visual led indicators on front of the Streamer.

6: Use as remote when off

If enabled, Streamer can also be used as a remote control for the hearing instruments even when Streamer is turned off.

Settings - Appearance

Visual appearance

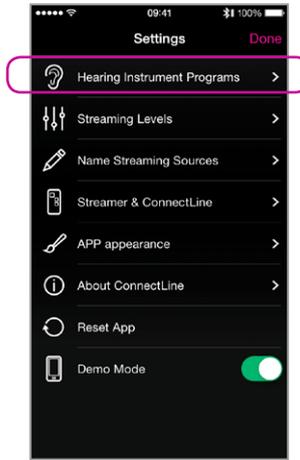

The visual appearance of the app can be changed so it is either black or white. (A)
For both colors, thin or thick icon outlines can be selected. (B)

Back dir

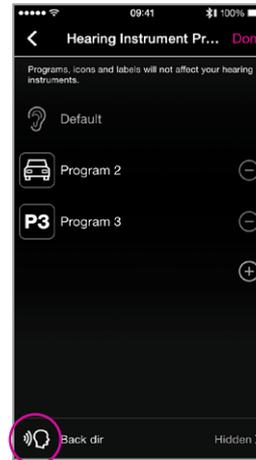

Enable

Back dir has to be enabled in the settings menu

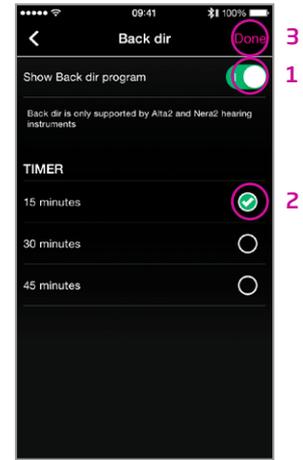

Settings

Select hearing instrument programs

Settings

Enable back dir

Settings

1. Show back dir on main screen
2. Set timer
3. Press done to save

Note:

Back dir is only supported by Alta2 and Nera2 hearing instruments

Troubleshooting

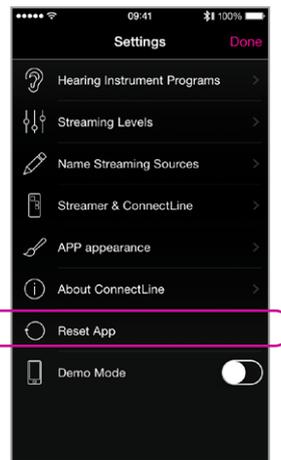

Close/restart App

Double tap on home to close app and show all active apps.

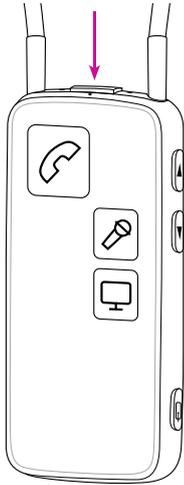

Close App

Swipe the ConnectLine App image upwards so that it is removed from the screen. It is now completely stopped.

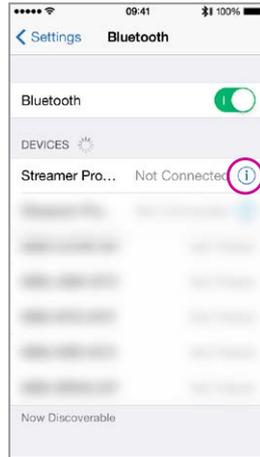

Reset App

Resetting the app will restore the app to its initial settings.

Reset Streamer

The Streamer is automatically reset when powered off/on.

Re-pair Streamer and iPhone, iPad or iPod touch

In some cases, especially if the iPhone, iPad or iPod touch and Streamer have been paired multiple times with other devices, it may be beneficial to clear all pairings in both the iPhone, iPad or iPod touch and the Streamer.

1. Turn Streamer off
2. On the iPhone, iPad or iPod touch: (settings > Bluetooth) select the small (i) and then press "forget device"
3. Turn off iPhone, iPad or iPod touch
4. Turn Streamer on
5. On the Streamer: hold "power on" AND "volume up" for 10 seconds
6. Turn on iPhone, iPad or iPod touch and re-pair Streamer (see page 4)
